Experience

Unity Game Developer

Bobaface LLC

July '25 - Present

- Refactored and optimized legacy code, reducing technical debt and improving system performance and maintainability.
- Cleaned up large monolithic scripts into modular and readable components by cutting over 1000 lines of code, streamlining future development and debugging.

Projects

Game Jams - Participated in over 18 game jams, won 3 awards, and led 9 teams. The awards are: Runner up for Quantum Game Jam, Best sound in Texas Game Jam 2024, Best Audio/Visual in Halloween Horror Game Jam.

A Slice of Lunch - Unity Game | Producer, Unity Gameplay Programmer

Sep '24 - (Target) Nov '25

CSUF Video Game Development Club Project | 2D puzzle lunch-packing game

- Led a team of initially 5 members (2 artists, 2 programmers, and 1 composer). Both programmers were new to game dev and I assisted them in implementing key features such as moving and rotating food. The current team consists of 4 members, including myself: 2 artists and 1 composer
- Implemented features such as slicing food, verifying win conditions, animations & cutscenes. Integrated code, art, and audio assets from team members, ensuring all elements work seamlessly together
- Designed and documented core mechanics, gameplay features, and overall game atmosphere in a game design document

Star Flux | Unity Gameplay Programmer

Nov '24 - (Target) Nov '25

Quantum Game Jam 2024 hosted by CalTech, Laguna College of Art & Design, Indie Game Academy

- Developed a 2D Strategy Pathfinding Game using the Quantum Forge Plugin in 1 week with 4 others
- Implemented features that mimicked quantum behaviors such as entanglement and phase rotation
- The team has continued to develop the game while working closely with Quantum Realms Games in publishing the game on Steam

Education

California State University, Fullerton

May '25

Bachelor of Science in Computer Science

GPA: 3.4

Important Coursework: Artificial Intelligence, Machine Learning, Principles of Computer Graphics

Extracurricular Activities

General Officer | CSUF Video Game Development Club

Aug '24 - May '25

- Coached teams in developing and completing their semester game projects
- Worked with board members to help set-up club events and weekly meetings

Skills

Languages: C#, C/C++, Python, Lua

Game Engines: Unity, Unreal, Playdate

Unity Plugins: Timeline, Shapes, Feel Quantum Forge, Odin Inspector / Serializer

Dev Tools: Jupyter Notebook, Android Studio, Git/Github
