Experience

Unity Game Developer

Bobaface LLC

July '25 - Oct '25

- Refactored and optimized legacy gameplay systems across a 100+ script codebase, removing 1,000+ redundant lines and reducing technical debt by 30%, improving performance, maintainability, and development efficiency
- Designed and prototyped a Suika-like puzzle game in Unity, to showcase game mechanics and physics interactions to demonstrate concept feasibility and engage stakeholders

Projects

Game Jams - Participated in over 20 game jams, won 3 awards, and led 9 teams. The awards are: Runner up for Quantum Game Jam, Best sound in Texas Game Jam 2024, Best Audio/Visual in Halloween Horror Game Jam.

A Slice of Lunch - Unity Game | Project Lead & Lead Programmer

Sep '24 - Present

Steam Game | 2D puzzle lunch-packing game

- Lead a 4 person team, including myself, to design, build, and publish a 2D puzzle game on Steam, overseeing creative direction, production milestones, and team coordination
- Program core features such as slicing, rotating and moving food using custom input handling and Unity components such as polygon colliders, sprite masks, and transformations to ensure precise and responsive interactions.
- Collaborate with my team to integrate features, art, and audio into each level to deliver cohesive and polished gameplay
- Design and maintain the Game Design Document (GDD), outlining core mechanics, planned cuisines, level design, and a development roadmap
- Published a [playable demo](#) on Steam, with an early access planned for Nov 21st with 200+ wishlists

Rhythmic Harmony - Unity Game | Lead Gameplay Programmer

Mar '25

Girly Game Jam (4 days)

Theme: Opposites Attract

- Designed and developed a beatmap creation tool using CSV files, enabling team members to build beatmaps without using Unity
- Implemented responsive player controls, timing-based scoring system, and custom beat animations that rewards accuracy in hitting the beats on time

Education

California State University, Fullerton

May '25

Bachelor of Science in Computer Science

GPA: 3.4

Important Coursework: Artificial Intelligence, Machine Learning, Principles of Computer Graphics

Extracurricular Activities

General Officer | CSUF Video Game Development Club

Aug '24 - May '25

- Coached teams in developing and completing their semester game projects
- Worked with board members to help set-up club events and weekly meetings

Skills

Languages: C#, C/C++, Python, Lua

Game Engines: Unity, Unreal, Playdate

Dev Tools: Jupyter Notebook, Android Studio, Git/Github
